

Workshop

HPC for Proteomics

December, 12th 2011

The Workshop “HPC for Proteomics”, organized by Cineca, will take place on the 12th of December and will gather experts of computer simulations in the field of life science, with the main goal to describe how to address proteomics problems with High Performance Computing (HPC) techniques, focusing in particular on the services available for Cineca HPC users.

RNBIO Advanced Training Course

Bioinformatics for Proteomics

December, 13th - 14th 2011

The aim of the Advanced Training Course “Bioinformatics for Proteomics”, to be held on the 13th and the 14th of December, is to improve the knowledge of the participants on technologies and bioinformatics tools available for the analysis of proteomic experimental data. The course is organized by the Italian Network for Oncology Bioinformatics (RNBIO).

Both the **workshop and the course will be held in English** and will take place at Cineca. Participation is **FREE**, but **registration is required before December 5th 2011**. More information about the agenda of the workshop, the program of the course, the form for the registration, along with the information about location and accommodation in Bologna, are available on Cineca's website.
