Accademia delle Scienze dell'Istituto di Bologna - Via Zamboni 31 - Bologna

## INTENTS and OBJECTIVES

- Establish and consolidate scientific collaboration between the Accademia delle Scienze dell'Istituto di Bologna and the Russian Academy of Natural Sciences.
- Confirm the importance of the Sciences as a synergy of the Natural Sciences and the Social Sciences.
- Respond to a successful vision of reciprocal need for scientific content in relation to the different themes of environmental safety and the protection and valorization of cultural heritage.
- Highlight that, while it is true that history establishes the identities born of the past and enables exchanges and cohesion between peoples of different nationalities, it is equally true that this is not only evident in the multifaceted commercial sector, but also in the scientific sector, among countries, both at international and intercontinental level.
- Point out, therefore, how the interdisciplinarity and internationalization of research, while respecting personal and interpersonal ethics, should fulfill what is so often advocated but rarely achieved.
- By providing a valid contribution to the sustainable development of Italy and Russia, the present Meeting can scientifically represent the “terminus of existence and eras” and, at the same time, the “beginning of renewal and recommencement”.
