# SHARED PERSPECTIVES 2023

## HOW TO MAKE THE GREEN TRANSITION HAPPEN?

Despite ambitious pledges made in Paris in 2015, with the EU at the forefront, the world is not on track to stop climate change within safe limits. Policies and public debates fall short of what has been promised.

*What can be done to make the green transition happen?*

**Shared Perspectives 2023** has leading policymakers and policy-focused economists discussing these questions based on economic evidence and charting politically feasible routes through the green transition.

The distinguished keynote speakers are **Mr. Daniele Franco** (former Italian Minister of Economy and Finance) and **Prof. Rick van der Ploeg** (University of Oxford).

The event will be livestreamed. You can also participate in the discussions. Please register at:
