

Workshop

Genetics and Genomics in Fisheries and Aquaculture at the University of Bologna: A Few Projects and Activities

12th February 2024 – from 11:00 to 13:00

Department of Agricultural and Food Sciences

University of Bologna,

Viale Fanin 48, room 8 - Bologna, Italy

Program

- **11:00-11:05.** Luca Fontanesi – *Introduction*
- **11:05-11:15.** Fausto Tinti – *The GenoDREAM Group*
- **11:15-11:35.** Alessia Cariani - *Moving toward multidisciplinary stock units' identification harnessing spatial population structure for the sustainability of Mediterranean fisheries*
- **11:35-11:55.** Fausto Tinti - *Challenging the conservation of marine biodiversity from the past: eco-evolutionary consequences of millennial exploitation in the Atlantic bluefin tuna *Thunnus thynnus**
- **11:55-12:05.** Luca Fontanesi – *The Animal and Food Genomics Group*
- **12:05-12:25.** Anisa Ribani – *Holothurians as alternative species for sustainable aquaculture: an overview of available genetic resources*
- **12:25-12:45.** Francesca Bertolini – *Genomic analyses in European seabass and gilthead seabream*
- **12:45-13:00.** *Final discussion*

Organizing Committee: **F. Bertolini, A. Cariani, L. Fontanesi, A. Ribani, F. Tinti**

For information and registration: **francesca.bertolini3@unibo.it**

We thank HOLOTHURIA project funded by the "Ricerca scientifica e affari generali" (PEMAC1) office of the General Directorate of Maritime Fisheries and Aquaculture of MASAF.
